Joseph Posas

Charlotte, North Carolina | Open to relocation | joseph.posasm@gmail.com | 980 899 3207 | josephposas.com | linkedin.com/in/josephposas

Summary

MS Cybersecurity student at UNC Charlotte (May 2027) building cloud-backed applications, identity-aware APIs, and data pipelines with Azure, Microsoft Entra ID, and Terraform. Seeking new-grad roles in cloud engineering and site reliability.

Education

University of North Carolina at Charlotte, Charlotte, NC
Accelerated Master of Science in Cybersecurity | GPA: 3.8/4.0 — May 2027
Bachelor of Science in Computer Science, Cybersecurity Concentration — May 2026

Experience

True Homes, Monroe, NC
Cybersecurity Rotational Intern — May 2026 – Aug 2026

- Built and shipped a self-service role administration feature as sole developer using Microsoft Entra ID, app roles, security groups, Microsoft Graph, RBAC, C#/.NET, REST APIs, DevExtreme, EF migrations, and Terraform.
- Provisioned cloud identity infrastructure across development, staging, and production environments using version-controlled Terraform, federated credentials, and secretless authentication patterns.
- Re-architected a metadata-driven analytics pipeline moving 40 business entities from Azure SQL into Microsoft Fabric, reducing the daily cycle from about 62 minutes to 4.

University of North Carolina at Charlotte, Charlotte, NC
Graduate Teaching Assistant (previously Teaching Assistant) — Dec 2024 – Present

- Developed a Python-based automated grading pipeline that evaluates programming assignments for 100+ students across 20+ assignments, reducing manual grading workflows for course instructors.
- Built a custom Model Context Protocol (MCP) integration with Canvas to connect course data and assignment workflows with AI-assisted grading tools.

Linxy, Charlotte, NC
Software Development Intern — May 2024 – Aug 2024

- Built customer and admin dashboards in React, adding role-based access controls to strengthen security.

Projects

Conoce Tu Profesor – Cloud Student Review Platform with AI Moderation — conocetuprofesor.com

- Built and launched a public education platform using React, Node/Express, Supabase Postgres, Google OAuth, protected routes, admin workflows, and deployment tooling.
- Implemented AI-supported review moderation to flag vulgar, inappropriate, or out-of-scope submissions before they affected platform quality.

Multi-Region Café Web Application on AWS — ITIS 5261 Course Labs (AWS Academy)

- Deployed a PHP and MariaDB web application on Amazon EC2 that reads its database credentials from AWS Secrets Manager, and debugged the server setup until online ordering worked end to end.

Skills

Cloud Platforms & Data: Azure, Microsoft Entra ID, Microsoft Graph, Terraform, AWS, Supabase, PostgreSQL, Azure SQL, Microsoft Fabric, Power BI
Development: C#, .NET, Python, SQL, JavaScript, TypeScript, React, Node.js, REST APIs, Docker, Linux, Git, GitHub Actions, Azure DevOps
AI, Automation & Security: Claude Code, MCP (Model Context Protocol), PowerShell, KQL, RBAC

Certifications

- Mastercard Cybersecurity Job Simulation (Forage), Jan 2025
