Joseph Posas

Charlotte, North Carolina | Open to relocation | joseph.posasm@gmail.com | 980 899 3207 | josephposas.com | linkedin.com/in/josephposas

Summary

MS Cybersecurity student at UNC Charlotte (May 2027) focused on cloud security and IAM: Microsoft Entra ID access controls, privileged access audits, and detection tuning. Seeking new-grad roles in security engineering, cloud security, and IAM.

Education

University of North Carolina at Charlotte, Charlotte, NC
Accelerated Master of Science in Cybersecurity | GPA: 3.8/4.0 — May 2027
Bachelor of Science in Computer Science, Cybersecurity Concentration — May 2026

Experience

True Homes, Monroe, NC
Cybersecurity Rotational Intern — May 2026 – Aug 2026

- Built and shipped a self-service role administration feature as sole developer using Microsoft Entra ID, app roles, security groups, Microsoft Graph, RBAC, C#/.NET, REST APIs, DevExtreme, EF migrations, and Terraform.
- Provisioned identity infrastructure for dev, staging, and production as version-controlled Terraform, separating privileged directory resources from the automated deployment path.
- Created read-only privileged access audit tooling in PowerShell across identity and security platforms, normalizing incompatible role models into one comparable risk-based access review record.
- Triaged the Microsoft Defender XDR incident queue, learning the alert, incident, and entity model before closing anything, and used KQL advanced hunting over service principal sign-in telemetry to characterize alerts across multiple identities in one query.
- Investigated an email spoofing campaign using header forensics, gateway policy review, SPF/DKIM/DMARC analysis, and audit-mode remediation planning.

University of North Carolina at Charlotte, Charlotte, NC
Graduate Teaching Assistant (previously Teaching Assistant) — Dec 2024 – Present

- Developed a Python-based automated grading pipeline that evaluates programming assignments for 100+ students across 20+ assignments, reducing manual grading workflows for course instructors.

Projects

Security Event Pipeline and Threat Intelligence Analysis with Splunk SIEM — GitHub

- Deployed Cowrie SSH honeypot and Splunk Universal Forwarder to analyze 475+ security events across 44 attack sessions.
- Built 3 Splunk dashboards mapping attacker behavior to MITRE ATT&CK, detecting T1087, T1105, and T1548 across 72 commands.

Multi-Region Café Web Application on AWS — ITIS 5261 Course Labs (AWS Academy)

- Applied least privilege in AWS IAM by placing users in groups with managed and inline policies, then signed in as each user to confirm which EC2 and S3 actions were allowed or denied.

Skills

Cloud Security & IAM: Microsoft Entra ID, Microsoft Graph, RBAC, Active Directory, least privilege, NIST 800-53, federated credentials, AWS IAM
Security Engineering: PowerShell, Splunk, SPL, Microsoft Defender XDR, SentinelOne, Mimecast, SPF/DKIM/DMARC, MITRE ATT&CK, Wireshark, Nmap, Burp Suite
Cloud, Development & AI: Azure, Terraform, AWS, KQL, Python, C#, .NET, SQL, Docker, Linux, Git, GitHub Actions, Claude Code, MCP (Model Context Protocol)

Certifications

- Mastercard Cybersecurity Job Simulation (Forage), Jan 2025
